**Success
connects.
Down to a
thousandth
of a
millimetre.**

A project is successfully realised when all the gears mesh perfectly and seamlessly. Why do we know this so well? Because this has been defko's mission for more than 70 years.

We stand for top quality and expertise from a single source. Simply defko. We maximise service at every step of the process. The highest level of expertise, a transparent pricing policy, easy accessibility for every request and prompt processing of enquiries and orders are a matter of course for us.

– Superior Sinter Solutions

Basically, you can see our work like this: We take a tried and tested technology, mix it with decades of accumulated know-how and thus create completely new, optimised solutions for our customers.

The strong basis of our high-precision sintered moulded parts is formed not only by DIN-based powders but also by a large number of powder mixtures developed in-house. This enables us to give the parts the properties that are optimally suited to the respective application.

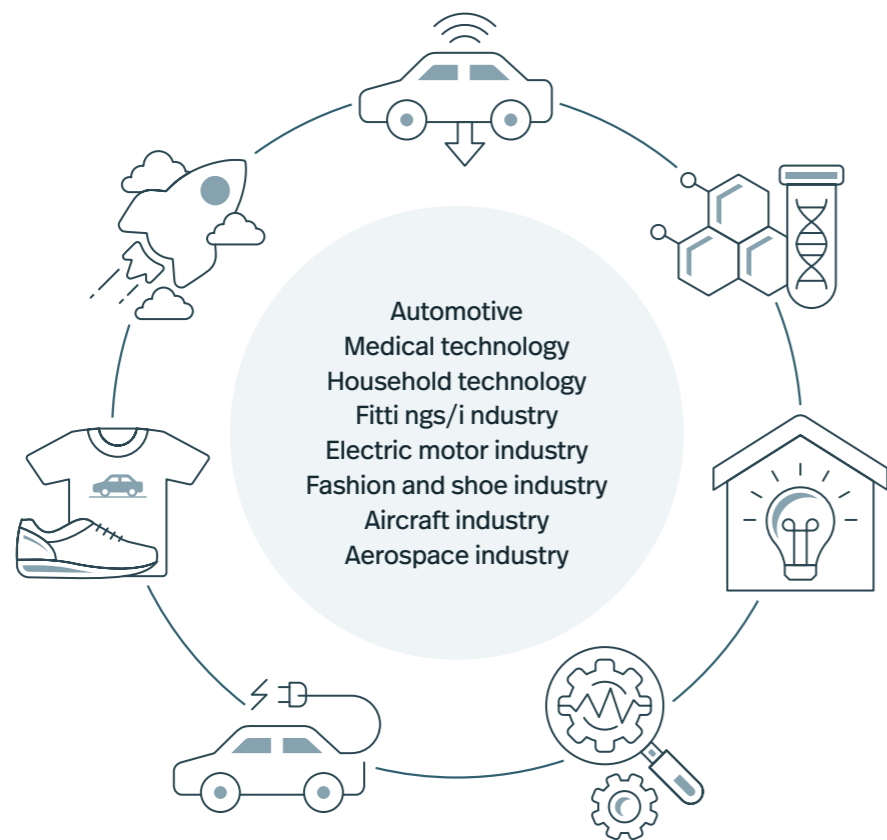

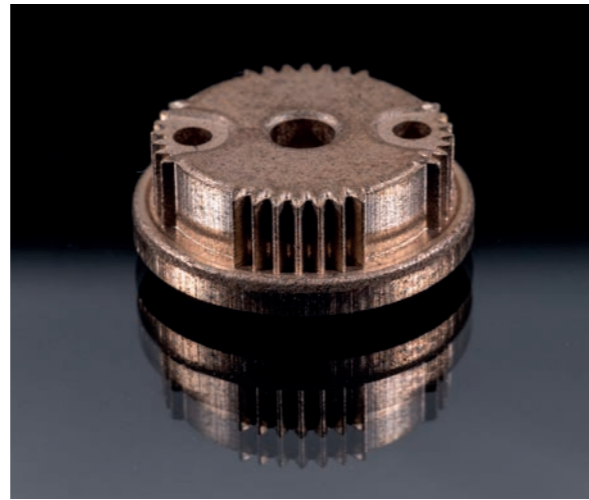

Our aim is to guide our customers so that they end up with a component that perfectly fulfils all technical requirements.

at the best price-performance ratio. Achieving this through our commitment and expertise is the heartbeat of our company.

Our components can be found in thousands of products in our daily lives. We produce simple as complicated geometries, also biocompatible and food-safe.

We are specialized in gear manufacturing and offer a wide range of post-processing and machining services.

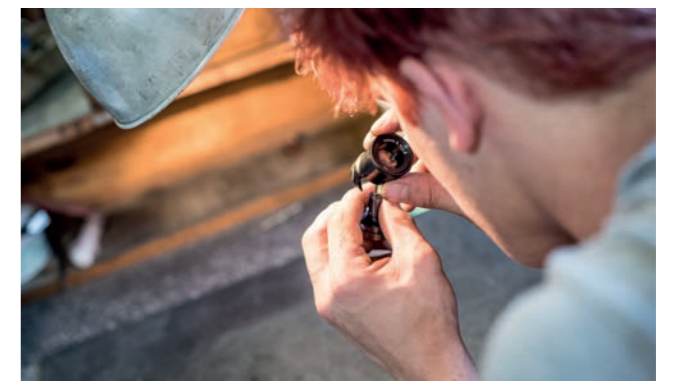

**Innovative,
 sophisticated
 products –
 biocompatible and
 food-safe – with our
 customers developed
 for the future
 together.**

Every tenth of a millimetre counts for our customers in the medical, aircraft and aerospace, DIY and household sectors, as well as the automotive industry.

Every sintered part is customised. We produce all moulds, tools and production equipment in-house for every project.

At defko, we have been working within a certified quality assurance system for more than 20 years. Whatever requirements you have for the sintered part - we are your reliable development partner for innovative solutions.

**We live the maximum service concept
at every step of the process!**

Our expertise is used in thousands of
applications and products, which are
parts in use of our daily lives.

As your partner, we support you
throughout the entire development
and manufacturing process. No
matter whatever your requirements,
you will find a solution at defko.
